

To participated in advanced PowerShell course, you have to complete Basic task below on your own.

Use the command below to develop a function which will adapt several values of paths to folders and retrieve a result (Measure-Object -Property Length -Sum) for each of paths conveyed. `Get-ChildItem -Path e:\ -Recurse -File | Measure-Object -Property Length -Sum`

The function should include as many solutions to problems as possible.

The work done aims to verify the level of skills of a person interested in the training.

Exercises solved have to be sent to the following e-mail address [szkolenia@altkom.pl](mailto:szkolenia@altkom.pl) 3 working days at the latest before the training starts
