AgileBA® Practitioner - accredited training with exam

Training recipients

AgileBA® Practitoner (Agile Business Analyst)

The course is aimed at experienced:

- Business analysts
- Change analysts
- Project Managers
- Scrum Product Owners
- System analysts who would like to apply agile approach
- Members of production teams (for example, Scrum developers) responsible for analysis

Benefits

Benefits for students:

- Deepening the knowledge and understanding roles and responsibilities of Business Analyst in agile approach
- Reminding business analysis' techniques and practices in agile approach
- Acquainting with ways of transition from more agile working methods
- Preparation for Practitioner exam

Benefits for organization:

- Teaches Business Analysts – both traditional and agile techniques of agile work.
- Scrum developers will benefit thanks to understanding the role of Business Analyst, because Scrum does not define and describe such role.
- Scrum Product Owners will gain new skills related to product development in agile way during the training.
