

# AI for business leaders

This training is designed for business leaders who want to adopt AI in their organizations. The course covers creating business value from AI, leveraging AI tools and resources, embracing responsible AI principles and practices, and scaling AI within organizations. Participants will learn to define a Microsoft AI strategy tailored to their specific industry sector. The training is available in six industry-specific versions: finance, healthcare, manufacturing, retail, sustainability, and nonprofit. Through a practical approach combining presentations, demonstrations, and discussions, participants will gain the knowledge necessary to effectively implement AI solutions in their business context.

Duration: 3,5 h

Training time: 8:30-12:00

## Training recipients

- Business leaders responsible for AI adoption and strategy implementation in their organizations who want to understand how to create business value from AI technologies.
- Executives and decision-makers who need to leverage AI tools and resources to drive digital transformation and competitive advantage in their industry sector.
- Senior managers and directors who must embrace responsible AI principles and practices while scaling AI initiatives across their organizations.
- Industry professionals in finance, healthcare, manufacturing, retail, sustainability, or nonprofit sectors who want to define a Microsoft AI strategy specific to their business domain.

## Benefits

- Industry-specific AI strategy – You'll learn to define a Microsoft AI strategy tailored to your specific

sector (finance, healthcare, manufacturing, retail, sustainability, or nonprofit), enabling you to create targeted business value.

- Comprehensive AI adoption framework – You'll gain knowledge across all critical areas of AI implementation, from business strategy and technology foundations to organizational culture and governance.
- Responsible AI implementation – You'll understand guiding principles and governance systems for responsible AI, ensuring your organization implements AI ethically and securely.
- Practical tools and resources – You'll discover Microsoft AI tools including Copilot, agents, and Azure platforms that you can immediately apply to drive transformation in your business.
- Scalable AI deployment – You'll learn proven approaches to unlock AI value, organize for success, and empower both business users and subject matter experts with AI capabilities.
- Real-world success stories – You'll explore case studies from leading organizations in your industry, providing concrete examples of successful AI implementation and measurable business outcomes.
