

# Certified Secure Computer User

## Certified Secure Computer User

The purpose of the authorized **EC-Council CSCU - Certified Secure Computer User** training program is to provide individuals with the necessary knowledge and skills to protect their information assets. This class will immerse students into an interactive environment where they will acquire a fundamental understanding of various computer and network security threats such as **identity theft**, online **banking phishing scams**, **credit card** fraud, backdoors and **viruses**, emails hoaxes, sex offenders lurking online, loss of confidential information, **hacking attacks** and **social engineering**. The program is designed to interactively teach the students about the whole gamut of information security threats they face ranging from identity theft and credit card fraud to their physical safety. More importantly, the skills learned from the class helps students take the necessary steps to mitigate their security exposure.

### Training recipients

This course is specifically designed for today's computer users who use the internet and the www extensively to work, study and play.

## Benefits

The courseware comes complete with demo videos and scenario-based discussion questions to allow the student to gain actual skills.

- Raising **awareness** of threats related to the activities of cybercriminals
- Reducing the **risk** of confidential data theft or phishing
- Lowering the risk of business process continuity loss
- Protection of the organization's ICT infrastructure

As part of the training, participants receive a voucher for the **CSCU** exam **112-12** to verify the acquired knowledge and skills

This certification is an excellent complement to educational offerings in the domain of security and networking.

## Training program

1. Introduction To Data Security
2. Securing Operating Systems
3. Malware and Antiviruses
4. Internet Security
5. Security On Social Networking Sites
6. Securing Email Communications
7. Securing Mobile Devices
8. Securing The Cloud
9. Securing Network Connections
10. Data Backup and Disaster Recovery
11. Securing IoT Devices and Gaming Consoles
12. Secure Remote Work

## Expected preparation of the participant

Basic computer skills

## Training Includes

- Authorized ebook

- Voucher for the CSCU **exam** (112-12)

Training method

- lecture
- workshops

## Language

- Training: English
- Materials: English

## Duration

2 days / 14 hours

## Examination description

### EXAM DETAILS:

Number of Questions: 50

Passing Score: 70%

Test Duration: 2 Hours

Test Format: Multiple Choice

Test Delivery: EC-Council Exam Portal
