CompTIA Data+ CertMaster Perform

CompTIA Data+

Exam series code: DA0-002

Master hands-on data analytics skills and prepare for real-world challenges with CompTIA Data+ CertMaster Perform. This comprehensive course combines instructional lessons, video, hands-on practice, and scenario-based exercises to help you apply your knowledge in practical environments. Aligned with Data+ DA0-002 exam objectives, it’s designed to reinforce your skills and prepare you for the Data+ (V2) certification.

- Skill development: Build skills and knowledge of a data analyst through a proven learning progression that emphasizes practice in collecting, processing, analyzing, and reporting data.
- Real-world tasks: Complete activities such as preparing datasets, querying databases, visualizing data, validating results, troubleshooting data issues, and applying governance standards.
- Interactive labs: Gain hands-on experience in both simulated and real data environments that mirror true data analytics scenarios, including ETL, visualization, and compliance tasks.
- Instructional lessons: Learn with narrative content, videos, and step-by-step labs to build foundational knowledge in topics like data structures, analysis, reporting, and governance.
- Skill tracking: Monitor your progress with assessments, quizzes, and feedback to ensure continuous improvement as you move through Data+ certification domains.
- Delivered in CertMaster Platform: Experience seamless navigation, centralized resources, and robust classroom management tools in CompTIA's modern online learning environment, accessible via CompTIA Central
- Year-long access: Study anytime with 12 months of training, redeemable within 12 months of purchase

Training recipients

CompTIA Data+ is an early-career data analytics certification that shows you have the practical skills to turn raw data into meaningful insights. Gain the confidence to analyze, interpret, and communicate data clearly, so you can solve real business problems, stand out to employers, and help your organization make smarter, data-driven decisions.

- Software Developer
- Data Analyst
- Data Scientist
- IT Manager
- IT Project Manager

Benefits

Skills learned

- Build a foundation in modern data concepts so you can confidently navigate analytics tools and data sources in any organization.
- Transform, clean, and organize raw data to make it reliable and useful for analysis.
- Apply statistical methods to extract trends, uncover insights, and support business decisions.
- Use data visualizations and dashboards to translate complex results into presentations anyone can understand.
- Maintain data quality, ensure compliance, and protect sensitive information in alignment with industry standards.
- Solve data problems, validate reports, and resolve analytics issues as they arise on the job.

Training program

.

Expected preparation of the participant

There are no formal prerequisites, but 18–24 months of practical experience in a data-centric role and basic skills in databases, analytics tools, and statistics are recommended.

Training Includes

- Data+ CertMaster Perform – ISBN: 978-1-64274-631-0

** The product does not include exam voucher – exam voucher must be purchased separately.*
