training code: PL-7008 / ENG DL 1d / EN

Create agents in Microsoft Copilot Studio

The training “PL-7008: Creating Agents in Microsoft Copilot Studio” is an authorized course aimed at preparing participants to create agents in Microsoft Copilot Studio. The course covers key topics related to building agents, managing topics and trigger phrases, configuring nodes, managing variables and entities, as well as utilizing generative AI and integrating with Dataverse.

Duration

1 day /6.5 h

Training recipients

This training is intended for:

- Administrators of the Microsoft Power Platform, who manage cloud resources, scale infrastructure, monitor the environment, and implement solutions in line with best practices for security and optimization.
- IT specialists, involved in data storage, virtual network configuration, and automation of administrative processes to increase operational efficiency of the organization.

Benefits

Participation in the training brings many benefits, including:

- Basics of scripting from scratch: You will learn to write your first commands in Microsoft Copilot Studio, even if you have never used scripting languages before.
- Practical learning: Through joint projects and independent labs, you will gain experience that can be easily translated into real tasks at work.

- Managing topics and trigger phrases: You will learn to effectively manage topics and trigger phrases in Microsoft Copilot Studio.
- Configuring nodes and managing variables: You will acquire skills in configuring nodes and managing variables and entities.
- Utilizing generative AI: You will learn how to use generative AI in Microsoft Copilot Studio to create more advanced and intelligent solutions.

Training program

1. Course Introduction
2. Create agents with Microsoft Copilot Studio

- Build an initial agent with Microsoft Copilot Studio
- Manage topics and trigger phrases
- Work with entities and variables
- Enhance Microsoft Copilot Studio agents
- Create an agent with Microsoft Copilot Studio and Dataverse for Teams

Expected preparation of the participant

- Familiarity with Microsoft Power Platform (PL-100)
  General understanding of Microsoft 365 Copilot (MS Copilot)
  Recommended and Featured Products:

  MS-4015: Build custom agent for Microsoft Teams
  MS-4010: Build plugins and connectors for Microsoft 365 Copilot
  To increase the comfort of work and training’s effectiveness we suggest using an additional monitor. The lack of additional monitor does not exclude participation in the training, however, it significantly influences the comfort of work during classes.
  You can find information and requirements of participation in Distance Learning trainings at: https://www.altkomakademia.pl/en/how-it-works/about-courses/

Training Includes

* electronic handbook available at:

https://learn.microsoft.com/pl-pl/training/

- access to the Altkom Akademia student portal

Product Includes

- Lectures (45%)
- Labs (55%)

Note: During selected training courses, the Academy provides participants with access to paid tools and services necessary to deliver the training programme, in particular Copilot Credits and other cloud resources.

Participants are required to use the resources provided exclusively for purposes covered by the training agenda and in accordance with the trainer's instructions.

Any use of these resources beyond the scope of the training, particularly for personal projects, testing additional services, modifying the environment configuration, or undertaking activities that generate costs unrelated to the completion of the exercises, will result in the participant being charged for any costs exceeding the allocated limit, based on the expenses incurred by the Academy.

For further details, please refer to the General Terms and Conditions of Participation in Training Courses

Duration
