

IT Manager Academy I

IT Manager Academy is a compact agenda of developing skills of managing IT which consists of two parts. A quick pace of developing technologies changes IT environment which requires specialists in this area to constantly gain new competencies. The IT working model also changes with a visible tendency of developing cooperation between IT and business which means that the role of typical IT specialist, who provides technical support, changes significantly and develops in the direction of solution architect. IT is required to cooperate and communicate in a clear and comprehensible way for the audience who are out of IT „world“. Famous declaration of Agile Manifesto (The manifesto for Software Developers) also underlines the essence of human factor as an important value in service delivering:

- people and interactions over processes and tools
- cooperation with a Client over negotiating contracts

Agile IT Manager Academy is a series of workshops developing IT team management skills and leading them in such a way so as to meet challenges of digital future and different business areas.
