Kanban System Design (KSD)

Designed for managers and other leaders who work directly with Agile teams understand how to best support, guide, and coach their teams to improve their Agile capabilities. The course provides the foundation for the role that leaders play in creating the conditions for a successful Agile transformation.

Kanban System Design is a course providing knowledge and skills necessary to design a Kanban system or improve an existing one. The training covers all the principles and practices of the Kanban method and introduces the basic concepts of flow, pull, and collaborative improvement.

Students participate in the Meirik Kanban Simulation, where they discover how each of the discussed elements of Kanban works in practice when the team is exposed to real-life situations. Equipped with that experience, students discover the STATIK (Systems Thinking Approach to Introducing Kanban) technique that helps them understand their current work system and design a Kanban system prepared for evolutionary improvements in the future.

Training recipients

The training is aimed at:

- **Managers and team members** who want to start a Kanban initiative
- **Managers and team members** who want to get more out of their current Kanban system
- **Professionals** looking to broaden and deepen their understanding of the Kanban method

Benefits

- Understanding the Kanban method, its principles, and practices
- Gaining knowledge on how to identify types of work items and service classes
- Learning the technique of designing a Kanban system (STATIK)
- Gaining experience working with the Kanban method through a simulation game
- Acquiring STATIK skills (Systems Thinking Approach to Introducing Kanban)

After completing the **Kanban System Design** and **Kanban Systems Improvement** training courses, you will earn the title of **Kanban Management Professional (KMP)**.

Training program

1. Introduction
2. Experiencing flow of work
3. The Kanban Method
4. STATIK
5. Designing a Kanban system
6. Summary

Expected preparation of the participant

There are no formal prerequisites for the participants of the course.

Training Includes

- Certified materials
- A certificate of completion for the Kanban System Design course

Duration

2 days / 16 hours

Language

- Training: English
- Materials: English
