MSP® Practitioner 5th edition (Managing Successful Programmes) – accredited training with exam

The Practitioner course in Managing Successful Programmes takes the theoretical knowledge acquired at the Foundation level to the realm of real applications.

A brief description of the MSP approach can be found on the [Foundation](#) page.

Training recipients

MSP Practitioner is designed for project, programme and business change managers who want to apply the MSP framework to real-life scenarios. Practitioner is a must-have certification for both project and programme management professionals who need to deliver organizational value for their employers and to boost their careers.

Benefits

The MSP Practitioner certificate is an internationally recognised qualification valid for 3 years. Practitioner status can be maintained either by re-taking the full exam, or by collecting an appropriate number of CPD (Continuing Professional Development) points; see the AXELOS website for details.

Training program

A highly interactive workshop, covering a mix of examination walk-through and a number of advanced

exercises based on one or more case studies.

Expected preparation of the participant

Before sitting the MSP 5th Practitioner exam, the candidate must first pass MSP 5th Foundation. Due to big differences between the 4th (2011) and 5th (2020) editions of MSP, the 2011 Foundation exam is not sufficient for the 2020 Practitioner.

An authorised MSP 5th edition handbook is obligatory at the training.

The handbook is not included in standard materials, you may purchase it in English language version.
