

PM² Foundation - accredited training with exam

PM² is a project management methodology developed by the European Commission. It is available to all interested parties. Its purpose is to support project managers in delivering effective solutions and generating benefits for their organizations. PM² enables efficient project management at every stage of the project lifecycle.

The PM² methodology combines best practices in project management from around the world. It has been adopted as an official standard by many European Union institutions.

Training recipients

This training is intended for:

- Project Managers (PMs) who want to gain knowledge about project management and the PM² methodology
- Project team members interested in the practical application of PM² in their daily work
- Project teams planning to implement the PM² methodology in their projects
- Project sponsors who want to better understand their role throughout the project lifecycle according to PM²
- All individuals involved in initiating and implementing projects, regardless of industry or level of experience

Benefits

- Understanding the key concepts and principles of the PM² methodology, enabling informed participation in projects
- Acquiring the skills to plan, monitor and control projects throughout their entire lifecycle
- Effectively managing project risks, changes, quality and requirements
