

PMP® Exam Prep - authorized training preparing for the exam

The training teaches how to apply a formalized, standards-based approach to project management in the context of PMI® practices and preparation for the Project Management Professional (PMP)® certification. It is intended for individuals responsible for initiating, managing, and overseeing projects, and will help organize knowledge, strengthen project manager competencies, and support development in the Project Manager role. After the training, you will be able to plan, communicate, monitor, and close projects more effectively, as well as prepare consciously for the PMP® exam.

The training is delivered based on the latest version of the PMP® exam and the PMBOK® Guide 8th Edition standard.

Training recipients

- People responsible for initiating, delivering, and supervising projects
- Project managers and sub-project managers without PMP® certification
- Project sponsors and individuals supporting project-related decisions
- Members of company management boards involved in project oversight
- Public administration managers working on projects
- People with practical project management experience preparing for PMP® certification

Benefits

- Organize project knowledge and broaden and systematize understanding of project management to

operate more effectively in a project environment

- Learn about and use globally recognized project management practices aligned with the PMI® approach
- Develop Project Manager competencies needed to formally take responsibility for a project
