

Professional Scrum Product Owner™ - Advanced (PSPO-A)

The Product Owner role is multifaceted, requiring them to engage in behaviours and adopt mindsets beyond the core of Agility and the Scrum framework. Students explore these techniques and how to pivot among them by exploring several Product Owner "stances".

Designed to empower Product Owners and Managers to refine their skills and competencies in Agile product management: crafting a compelling vision, validating hypotheses, and maximising value delivery. This course is an interactive, experiential workshop where participants explore topics through a series of exercises and discussions.

In this class, students will gain a better understanding of what it means to deliver value and how to express that value inside and outside of their organisation. Through a case study-based series of exercises, combined with instruction, students gain the entrepreneurial product leadership skills and practices critical to growing as a successful Product Owner.

Training recipients

This course is designed for Product Owners, Product Managers, and Business Analysts, focusing heavily on product management skills, tools, techniques, and knowledge as part of their work on the Scrum Team.

Other people that might benefit from the PSPO-A course include:

- Scrum Masters / Agile Coaches
- Company leaders

Benefits

- Experienced Product Owners will learn different stances a Product Owner takes to navigate everyday challenges
- Modern complementary practices will be introduced through discussions, case studies and exercises
- You will leave with a clear understanding of Agile Product Management as they continue on their Product Owner journey
- You will learn about the various types of stakeholders that Product Owners represent and how to best work with them.

Training program

1. Introduction
2. The stances of the Product Owner
3. Understanding product and its customers
4. Communicating the vision & strategy of the product
5. Innovation and experimentation in product development
6. Decision making in product ownership
7. Agile governance
8. Stakeholder management
9. Summary

Expected preparation of the participant

There are no formal prerequisites for the participants of the course. Prior completion of the Professional Scrum Product Owner™ course or holding the PSPO I certificate is recommended. This course does not teach Scrum; therefore, you need to understand the basics of the framework. To benefit from the course fully, you need to know the essential practices of Agile product management.

Training Includes

- Certified materials
- Voucher for the PSPO II exam

Language

- Training: English
- Materials: English
- Exam: English

Examination method

The Professional Scrum Product Owner II (PSPO II) exam is an online assessment. Participants of the PSPO-A course receive a one-time code to access the test within five workdays after completion of the course. It is not mandatory to take the assessment; however, it is the only way to obtain the PSPO II certificate.

The code for the exam doesn't expire. However, if you take the test within 14 days from the moment of receiving the code and you fail, Scrum.org will issue yet another code for the second (and last free) attempt.

More information about the assessment is available on

<https://www.scrum.org/assessments/professional-scrum-product-owner-ii-certification>

Duration

2 days / 16 hours

Examination description

- Duration of the exam: 60 minutes
- Required passing score: 85%
- Number of questions: 40
- Type of questions: multiple choice, multiple answer
- Number of allowed exam attempts: 2 (under the condition that the first attempt needs to be unsuccessful and take place within 14 days from the moment of receiving the access code)
