

SAFe® Lean Portfolio Management

What skills do you need to deliver value in a Lean enterprise? The SAFe® Lean Portfolio Management (LPM) course covers the all essential aspects to build effective and comprehensive Lean Portfolio. The course also gives you the guidance and tools you need to work with best possible results to manage and improve your organizations' projects and products. LPM workshop will help you and your key stakeholders plan dynamically and be flexible enough to adjust initiatives and budgets as the market changes.

The SAFe Lean Portfolio Management workshop aims to provide participants with a comprehensive understanding of how to effectively align strategy and execution within an organization using the principles of Lean and Agile. Participants will learn how to establish and manage a Lean portfolio to ensure that investments are aligned with organizational goals to maximize value delivery.
