Team Kanban Practitioner (TKP)

The Team Kanban Practitioner course introduces participants to the foundational elements of the Kanban Method, a work management approach focused on continuous improvement and effective delivery. They'll learn how to visualise the team's work, limit work in progress, and optimise flow. The course covers Kanban's six general practices, including visualisation, work in progress limits, managing flow, and using feedback loops. Participants will also explore the three change management principles, which promote starting where they are, pursuing evolutionary change, and fostering leadership at all levels. By the end of the course, participants will be equipped with practical tools to implement Kanban in day-to-day work and improve team outcomes.

Training recipients

This course is designed for team members and leaders who are new to Kanban and want to gain an understanding of its key principles. It is especially beneficial for those looking to improve visibility, communication, and collaboration within their teams.

Benefits

- Understanding the basics, motivation, and benefits of the Kanban method for the team
- Experiencing the advantages of WIP limits in improving flow
- Learning how to run Kanban meetings to focus on work and enable the team to self-organize around it
- Gaining knowledge on how to advance in working with Kanban and apply initial practices in daily tasks
- Becoming faster and more flexible with better risk management and oversight

- Understanding pull systems and how they help reduce work overload
- Developing the ability to track Lead Time, build, and use lead time distributions
- Learning modern complementary practices through discussions, case studies, and exercises

Training program

1. Introduction to the class and Kanban
2. Experience Kanban practices
3. Applying Kanban in a team
4. The Kanban Method
5. What’s beyond & closure

Expected preparation of the participant

There are no prerequisites to attend this course.
