Agile Project Management® v3 Practitioner - accredited training with exam

The AgilePM® standard is one of the most mature Agile standards. This training is based on the latest, third version of the standard. It combines the agile project governance offered by the AgilePM® approach with the agile approach to project delivery from the Scrum framework.

The training course responds to the needs of professionals to ensure strong project governance while applying an agile approach to project delivery based on effective team collaboration.

The training course lasts 2 days, during which participants complete exercises designed to acquire knowledge and skills related to the application of the AgilePM® methodology.

Training recipients

The training is aimed at:

- Persons responsible for commissioning, implementation and supervision over the course of projects, regardless of the industry
- Sponsors, project managers and team members and members of project offices
- Analysts, programmers and testers
- For all those working in a design environment who want to use AgilePM®'s agile project management concept
- Anyone who holds a Foundation level certificate and wants to obtain AgilePM® Practitioner certification

Benefits

- Experience of practical elements of work in an agile project (using Agile and Scrum) and learning how to:
  - scale the approach in various types of projects, including non-IT projects
  - deliver business value earlier than in traditional projects
  - make activities more flexible to adapt to changing circumstances
  - reduce the risk of delivering poor-quality products by using an incremental and iterative approach to their development
  - build a work environment that supports transparency
- Opportunity to obtain a globally recognised certificate in agile project management – Agile Project Management® v.3 Practitioner

Training program

1. Introduction to the course
2. Main elements of AgilePM® v3 standard
3. Practical group exercises based on a project scenario
   - Team structure and Way of Working
   - Risk Management and the AgilePM® Approach
   - Identifying Product Goal
   - Identifying Product backlog items
   - Using T-shirt estimation
   - Using MoSCoW Prioritisation
   - Responding to change
   - Delivery Planning
   - The multi-team dimension
   - Regulatory Compliance
   - Demonstrate Control
4. AgilePM® Practitioner v3 Exam

Expected preparation of the participant

Possession of the AgilePM® Foundation v3 certificate is required.
During the training, it is mandatory to have the authorized Agile PM® v3 manual.
The manual is not included in the standard training materials but can be purchased through Altkom Akademia.
