ArchiMate® Workshop for Practitioners - Distance Learning

Training recipients

The training is intended first of all for architects and designers responsible for developing architectural models in the field of Enterprise Architecture. The training is also recommended to the rest of stakeholders who participate in architectural work, and will be responsible for architecture review or they will be the recipients of the architecture deliverables and must understand the meaning of particular elements of the model, as well as the relationships between them.

Benefits

ArchiMate® 3 is an open and constantly developed language used to create Enterprise Architecture models. It allows for modelling strategy, goals, principles, requirements, business domain, and IT systems,. It provides definitions of Enterprise Architecture concepts and graphical notations to support the communication between stakeholders. It perfectly complements TOGAF® 9.2 standard. However, it may also be used in combination with another architecture framework.
ArchiMate® Workshop for Practitioners training fully covers a set of issues defined by The Open Group in a syllabus, by providing an essential knowledge which is required to apply for ArchiMate® 3 Certified certificate. The completion of the training will allow to prepare well for certification exam.
The training allows to acquire knowledge about all elements and relationships described in ArchiMate® 3 standard and acquire skills of using them in practice during workshop exercises.
Altkom Akademia sp. z o.o. acquired the prestigious status Gold Member of The Open Group. Our trainers actively participate in the work for developing standards and in architectural projects. The training constitutes a space to share knowledge – both theoretical and practical.
ArchiMate® Workshop for Practitioners training is accredited by The Open Group.

Training program

- Basic construction of the language
  - Basic language concepts
  - Language structure
  - Generic metamodel
- Modelling Relationships
- Modelling Motivation
- Modelling Strategy
- Modelling Core Layers
  - Modelling Business
  - Modelling Applications and Data
  - Modelling Technology
- Modelling Physical Elements
- Modelling Transformation (Implementation and Migration elements)
- Modelling relationships between core layers
- Stakeholders, Architecture Views, and Viewpoints
- Language Customisation Mechanisms

ArchiMate® is a registered trademark of The Open Group

Expected preparation of the participant

- Participation in the training: WAK – Introduction to the Enterprise Architecture
- Participation in the training: TG01+02 – TOGAF® Workshop for Practitioners

The training price includes a voucher for the exam: ArchiMate® 3 Part 1 and Part 2 Bundle Exam Voucher.
You need to schedule the exam yourself within 12 months from the voucher issue date at any Pearson VUE exam center.

Language

- Training: English
- Training materials: English
