kod szkolenia: SAP/S4TM3 / ENG

Charges and Settlement in SAP S/4HANA TM

- This course will help you to prepare for the implementation stage of your SAP Transportation Management project or enable you to configure the system in your role as an application consultant. You will be able to create the necessary master data and configuration in SAP Transportation Management to perform charge calculation.
- Furthermore, the course explains how to set up SAP Transportation Management (TM) as well as its integration into Materials Management (MM) to facilitate freight settlement processes. With this course you will be able to explain how to distribute costs to the originating delivery items. Furthermore, this course explains the Strategic Freight Procurement process and the necessary configuration steps to implement it in SAP TM.
