CompTIA Cloud+ CertMaster Perform

CompTIA Cloud+

Exam series code: CV0-004

Master hands-on cloud computing and prepare for real-world challenges with Cloud+ CertMaster Perform. This comprehensive course combines instructional lessons, video, hands-on practice, and scenario-based exercises to help you apply your knowledge in practical environments. Aligned with Cloud+ exam objectives, it’s designed to reinforce your skills and prepare you for the CompTIA Cloud+ (V4) certification.

- Skill development: Build skills and knowledge of a cloud administrator through a proven learning progression design that emphasizes context and practice.
- Real-world tasks: Complete activities like configuring cloud environments, managing workloads, and optimizing performance.
- Interactive labs: Gain hands-on experience in both simulated and real environments that replicate real-world IT scenarios.
- Instructional lessons: Learn with narrative content, videos, and guided labs to build foundational knowledge.
- Skill tracking: Monitor progress with assessments, quizzes, and actionable feedback to ensure continuous improvement.
- Year-long access: Study anytime with 12 months of training, redeemable within 12 months of purchase

Training recipients

CompTIA Cloud+ validates your skills in cloud infrastructure, making it the industry standard for professionals working in multi-cloud environments. With this certification, you'll cover critical areas such as cloud architecture, deployment, operations, security, DevOps fundamentals, and troubleshooting. CompTIA Cloud+ equips you with the hands-on skills you need to excel in cloud operations and advance your career in the growing field of cloud computing.

- Systems Analyst,
- Cloud Architect,
- Systems Engineer
- IT Manager

Benefits

Skills learned

- Analyze cloud models and design solutions to meet business requirements for effective cloud architecture.
- Execute workload migrations, implement infrastructure as code (IaC), and provision cloud resources to support deployment.
- Manage and optimize cloud environments by scaling, performing backups, and ensuring recovery operations.
- Implement security measures, address vulnerabilities, and ensure compliance with standards like PCI DSS and ISO 27001.
- Apply DevOps fundamentals, including source control, CI/CD pipelines, automation, system integration, and DevOps tools.
- Diagnose and resolve deployment, network, and security issues to troubleshoot cloud environments effectively.

Training program

.

Expected preparation of the participant

Recommended Experience:

About 5 years total IT experience, including 2-3 years as a systems administrator or cloud engineer

Training Includes

- Cloud+ CertMaster Perform – ISBN: 978-1-64274-529-0

** The product does not include exam voucher – exam voucher must be purchased separately.*
