Introduction to Cloud Infrastructure

Authorized training Introduction to Cloud Infrastructure AZ-900 on-line course.

This course is for:

- Administrator
- HelpDesk
- IT specialist

Training recipients

This one- day training is intended for the people interested in acquiring basic knowledge about cloud services and the way they are delivered from Microsoft Azure.

The course might be an optional first step to gain knowledge about Microsoft Azure cloud services before the participants start to attend next courses related to these services. The thematic scope can also be helpful in sales departments' work and in IT companies' marketing.

The course includes such issues as:

- basic knowledge about the concept of Azure platform;
- basic Azure platform services;
- basic solutions and management tools;
- general and network security;
- functions of management, privacy and compliance;
- managing costs of Azure platform and Service Level Agreements.

Attention: this course does not provide participation in practical classes

Benefits

Gaining knowledge from cloud with particular regard to Microsoft Azure cloud services offer. This includes acquaintance with:

- General concepts of cloud computing, basic services available in Microsoft Azure, security, privacy, compatibility and trust in Microsoft Azure, prices and support models available in Microsoft company.

Become Microsoft Certified: https://arch-center.azureedge.net/Credentials/Certification-Poster_en-us.pdf

Training program

Training path 01: Cloud terms

- Cloud computing
 - What is cloud processing
 - Shared responsibility
 - Cloud models
 - Capital and operational costs
- Cloud benefits
 - Cloud benefits
- Cloud services
 - IaaS, PaaS and SaaS

Training path 02: Azure services and architecture

- Azure platform architecture components
 - Availability regions and zones
 - Subscriptions and resource groups
- Calculations and networks
 - Calculation types
 - Application hosting
 - Virtual network
- Storage
 - Storage services
 - Redundation types
 - File management and migration
- Identity, access and security
 - Catalog services
 - Authentication methods
 - Security models

Training path 03: Management and supervision

- Cost management
 - Cost and price calculators
 - Cost management and tags
- Management and compatibility
 - Blueprint, policies, resource locks
 - Service Trust Portal
- Resource deployment tools
 - Portal, PowerShell, CLI and other
