

Introduction to Microsoft Power Platform

Authorized Microsoft Introduction to Microsoft Power Platform PL-900 Distance Learning training.

The training covers fundamentals of Microsoft Power Platform, teaching students how to create Power Platform apps, automate processes, build websites, and connect data using Dataverse. It's an authorized Microsoft training that prepares participants for the PL-900 certification exam. Through a practical approach, participants will gain essential knowledge about Power Apps, Power Automate, Power Pages, and other key components of the Power Platform ecosystem.

Training recipients

- Business users looking to build applications and automate processes using Power Platform
- Functional consultants seeking to understand Power Platform capabilities
- Students preparing for PL-900 certification
- Individuals interested in low-code development and business process automation

Benefits

- Comprehensive Power Platform foundation – You'll learn the core components and capabilities of Microsoft Power Platform, enabling you to start building business solutions
- Practical application development skills – Through hands-on labs, you'll learn to create both canvas and model-driven apps in Power Apps
- Process automation expertise – You'll gain skills in building automated workflows using Power Automate
- Website creation capabilities – You'll learn to build business websites using Power Pages

- Certification preparation – The course directly aligns with PL-900 certification requirements, preparing you for the exam

Training program

 - Describe the business value of Microsoft Power Platform services
 - Describe the business value of extending business solutions by using Microsoft Power Platform
2. Manage the Microsoft Power Platform
 - Describe Microsoft Dataverse
 - Describe Microsoft Power Platform administration and governance
3. Demonstrate the capabilities of Microsoft Power Pages
 - Describe the capabilities of Power Pages
 - Create a Power Pages site
5. Demonstrate the capabilities of Microsoft Power Apps
 - Identify -driven app
6. Demonstrate the capabilities of Microsoft Power Automate
 - Identify basic Power Automate components
 - Build a basic Power Automate flow

Expected preparation of the participant

It is recommended to be experienced in working with Microsoft Office, Microsoft Excel and Microsoft Outlook. However, it is not required to have experienced in Microsoft Power Platform to participate in the training.

An ability to use English language material

To make work more convenient and training more effective we suggest using additional screen. Lack of extra screen does not make it impossible to participate in the training, but significantly influences the convenience of work during classes

Information and requirements concerning participation in distance learning trainings is available at: <https://www.altkomakademia.pl/en/how-it-works/about-courses/>

Training Includes

* electronic handbook available at:

<https://learn.microsoft.com/pl-pl/training/>
