

Leveraging Advanced Features in SAP Analytics Cloud for Planning

Odbiorcy szkolenia

- Application Consultant
- Business Analyst
- Data Consultant
- Technology Consultant
- Data Analyst

Korzyści

- This course will prepare you to:
 - Automate the processing of plan data using data actions.
 - Set up planning functions that execute calculations within a model or between models.
 - Set up and perform allocation of plan data.
 - Set up and perform currency translations.
 - Work with forecasting and data simulation functionality (Smart Predict, value driver trees, and compass).
 - Set up data access controls to prevent data changes by either data entry or by planning operations in a story.
 - Track the planning process using the calendar process tool.

Program szkolenia

- Using Data Actions to Copy Data Within a Model and Between Models
