# Profitability Analysis in SAP S/4HANA

- Participants of this course will learn to configure and use the fundamental business processes in Profitability Analysis in SAP S/4HANA, both Margin Analysis and CO-PA Costing-based. First, an analysis of the relations of organizational and data structures in SAP S/4 HANA (mainly Finance) is presented. Next, the focus is on master data with consideration of the alignment of characteristics in COPA in general and the valuations in COPA costing based. Furthermore, the actual postings and their corresponding line items in COPA will be explained, including an understanding of the system table views. The planning in Profitability Analysis will be introduced with manual planning in COPA and plan integration in COPA costing based. You will learn how to use the information system and to create ad hoc - and form-based reports.
