SAP BusinessObjects Web Intelligence: Report Design II

This 2-day course is designed to enhance and advance your Web Intelligence skills. You will learn advanced query techniques, including subqueries and combined queries. You will also learn how to use the data mode (view data, prepare data, create, and manage cubes), to manipulate calculation contexts, to create complex formulas (with nested functions and IF logic), as well as implementing other useful reporting features, such as tracking changes in data and linking options.

Odbiorcy szkolenia

- Application Consultant
- Business Analyst
- Business Process Owner / Team Lead / Power User

Korzyści

- This course will prepare you to:
  - Use advanced query panel features
  - Create a document with multiple queries
  - Work in data mode
  - Work with calculation contexts
  - Use functions in the formula and variable editors
  - Implement data tracking and shared elements
  - Adding interactivity to a document

Program szkolenia

1. Creating a Document with Multiple Queries
   - Understanding the Concept of Multiple Queries
   - Building Queries based on Microsoft Excel
   - Building Queries based on Web Intelligence Documents
   - Changing the Data Source of a Query
2. Working in Data Mode
   - Viewing Data
   - Preparing Data
   - Creating and Managing Cubes
   - Editing Objects Properties
3. Using Advanced Query Panel Features
   - Using Data from Another Query
   - Implementing Subqueries
   - Implementing Combined Queries
4. Working with Calculation Contexts
   - Outlining Calculation Contexts
   - Redefining Calculation Contexts
   - Implementing Extended Syntax Operators
   - Implementing Extended Syntax Keywords
5. Using Functions in the Formula and Variable Editors
   - Creating Formulas with Character Functions
   - Concatenating Character Strings
   - Implementing Date Functions
   - Implementing Misc Functions
6. Grouping Data and Using If Logic
   - Grouping Data
   - Modifying Calculations using If
7. Reporting with Additional Techniques
   - Implementing Data Tracking
   - Implementing Shared Elements
8. Adding Interactivity to a Document
   - Filtering Dynamically Using Element Links
   - Using Hyperlinks

Oczekiwane przygotowanie uczestnika

Essential

- [BOW310](#) SAP BusinessObjects Web Intelligence 4.3: Report Design I

Recommended

- None
