

Securing Email with Cisco Email Security Appliance v3.2

The **Securing Email with Cisco Email Security Appliance (SESA)** training shows you how to deploy and use Cisco® Email Security Appliance to establish protection for your email systems against phishing, business email compromise, and ransomware, and to help streamline email security policy management. This hands-on training provides you with the knowledge and skills to implement, troubleshoot, and administer Cisco Email Security Appliance, including key capabilities, such as advanced malware protection, spam blocking, anti-virus protection, outbreak filtering, encryption, quarantines, and data loss prevention.

This training prepares you for the 300-720 SESA v1.1 exam. If passed, you earn the Cisco Certified Specialist – Email Content Security certification and satisfy the concentration exam requirement for the CCNP Security certification. This training also earns you 24 Continuing Education (CE) credits towards recertification.
