Software Logistics for SAP S/4HANA and SAP Business Suite

- If you are responsible for the software logistics at your organization – for SAP S/4HANA systems and for SAP Business Suite systems – this course is for you.
- During this course, you will learn how to set up a transport landscape matching your requirements. You will get acquainted with creating, releasing, exporting, and importing transport requests. Beyond concepts, a great amount of emphasis is placed on the mode of operation and error handling within this course. Additionally, topics like client copy and the import of SAP Support Packages including required modification adjustments (SPDD/SPAU) are handled.

Odbiorcy szkolenia

- System Administrator
