Sustainable project management (PRiSM™ Practitioner) - accredited training with exam

This training provides practical tools and methodologies that enable the integration of sustainability principles into everyday project work — from initiation, through planning and execution, to project closure and the management of long-term value beyond project completion. It is intended for project and programme managers, ESG and CSR specialists and PMO professionals who want to translate sustainability requirements, non-financial reporting obligations and stakeholder expectations into everyday project practice.

After the training, you will be able to assess a project's impact on the environment, society and the economy, develop a Sustainability Management Plan, and prepare for the CSPP™ exam.

Training recipients

- Project and program managers
- ESG and CSR specialists
- PMO professionals
- Management staff responsible for project initiatives
- People delivering projects in regulated organizations
- People preparing for CSPP™ certification

Benefits

- Integrate sustainability with projects – you will learn how to apply the PRiSM™ methodology to incorporate environmental, social and economic factors into project work
- Understand the P5™ Standard – you will assess a project's impact on product, process, people, planet and prosperity to manage the consequences of project decisions more effectively
- Develop a Sustainability Management Plan – you will prepare an SMP as part of the documentation supporting the management of goals, KPIs and responsibilities
- Learn how to integrate ESG indicators and KPIs with project documentation to monitor, report and justify project decisions more easily.
- Distinguish key sustainability factors in projects to identify risks, stakeholder requirements and areas of impact more accurately.
- Translate sustainability requirements into everyday project work to make project decisions aligned with organizational goals and market expectations.
- Prepare for the CSPP™ exam – you will organize the knowledge required to attempt the Certified Sustainable Project Professional certification

Training program

1. Introduction to sustainable project management — foundations and global context
2. The "Beyond Do No Harm" principle and the regenerative approach
3. Sustainability models (Triple Bottom Line, circular economy)
4. Global frameworks: SDGs, ESG, non-financial reporting — implications for projects
5. The project as a vehicle for creating long-term organisational value
6. Sustainable governance and project culture
7. PRiSM™ methodology — philosophy, lifecycle, phases, and key deliverables
8. The sustainability-aligned business case and benefits management
9. The P5™ Standard — five dimensions and 52 impact categories
10. P5™ Impact Analysis (environment, society, economy)
11. Sustainability Management Plan (SMP) — structure, KPIs, and integration with project documentation
12. Sustainability reporting — GRI alignment, ISSB convergence, project-level disclosures
13. CSPP™ exam preparation — review and consolidation

Expected preparation of the participant

- You have basic knowledge of project management
- You hold one of the following certificates or degrees – if you want to take the shortened exam version

for Certified Practitioners:
  - PMI: PMP®, PfMP®, PgMP®, CAPM®
  - IPMA: Level A, B, C or D
  - PRINCE2®: Project Manager Practitioner, Programme Manager Practitioner, Portfolio Manager Practitioner
  - AIPM: CPPM, CPSPM or RegPM
  - APM: PMQ, ChPP, RegPM, MPLSC
  - Master's degree with a concentration in Project or Programme Management (from an accredited university)
- If you do not hold any of the certificates or documents listed above, you may take part in the training and Non-Certified Practitioners certification; however, we recommend prior participation in the Project Management – foundation level.

Training Includes

As part of the training, participants receive:

- GPM Sustainable Project Management® Practice Guide 3.0 textbook in Polish
- PMI-GPM P5™ Standard for Sustainability in Project Management 3.0 in Polish
- A complete set of training presentations
- A set of practical exercises and templates that support implementation of the tools learned in everyday work

Note: The price does not include an exam voucher.

Language

- Training: English
- Materials: English
- Exam: English

Examination method

The exam is delivered online through the accredited Pearson VUE examination center. The candidate may take the exam at an on-site testing center or online with remote proctoring. Participants take the exam through one of two paths: Certified Practitioners or Non-Certified Practitioners. The CSPP™ certificate is valid for 5 years, and its renewal requires collecting the required Professional Development Units (PDUs) under the Continuing Certification Requirements program run by PMI.

Czas trwania

2 dni / 16 godzin

Examination description

Certified Practitioners Pathway

For individuals holding an active qualifying certification or a Master's degree in Project or Programme Management
